

ITALY TRIP COST CALCULATOR

We created this calculator to help you plan an independent trip to Italy. It is intended to give you a general guide to the total cost of your trip without flights. We modeled the calculator based on knowledge gained from our many recent trips and hope you find it useful.

As every trip is different, exchange rates and other factors change over time, the tool should not be considered an exact representation of your trip costs. Rather, use it as a guide to estimate your own trip costs, and benchmark travel agent quotes and tour costs.

HOW TO USE THE CALCULATOR

1. Click the button to open the spreadsheet tool in Google docs
2. Make a copy and save to your Google drive
3. Enter your data into the GREEN CELLS only
4. Watch our instruction video if you get stuck
